BEA 96-10

STATE PER CAPITA PERSONAL INCOME GROWTH IN 1995

Large increases in income from dividends, interest, and rent boosted per capita personal income growth in the 10 fastest growing states in 1995, according to preliminary estimates by the Commerce Department's Bureau of Economic Analysis. Five of the states with the fastest growth in per capita income were in the West -- Arizona, Oregon, Utah, New Mexico, and California; the others were Louisiana, Michigan, New Hampshire, Rhode Island, and South Carolina.

For the nation, per capita income increased 5.0 percent in 1995, to \$22,788, up from \$21,699 in 1994. Prices paid by U.S. consumers, as measured by the price index for personal consumption expenditures, increased 2.4 percent. Nearly all states had increases in per capita income that exceeded the increase in prices; only North Dakota had an increase in per capita income that was less than 2.4 percent, and only South Dakota had a decline in per capita income.

Fastest growing states

In ten states, increases in per capita personal income were 1.0 percentage point or more above the U.S. average of 5.0 percent.

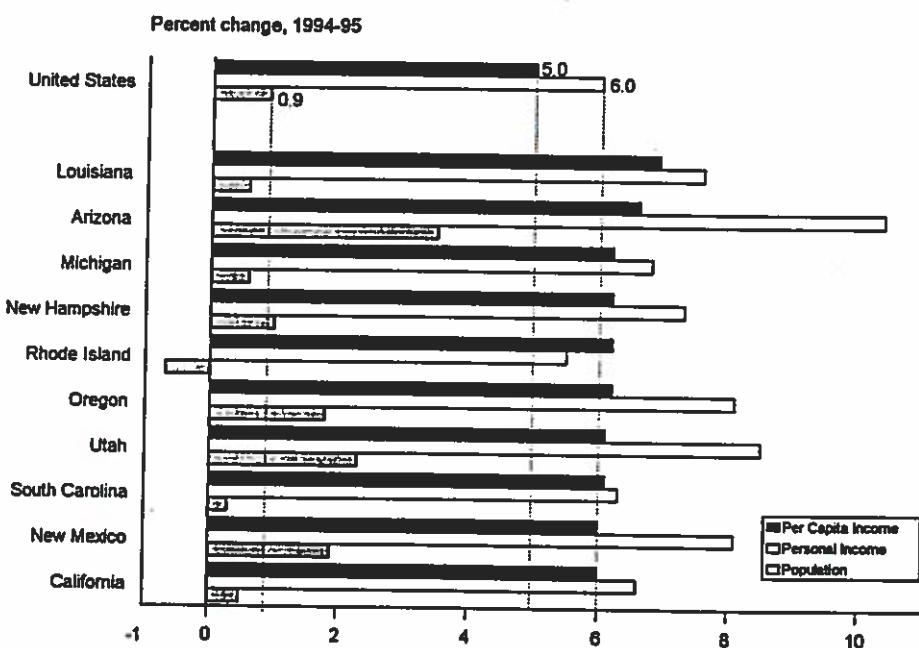

In the five western states of Arizona, Oregon, Utah, New Mexico, and California, large increases in dividend, interest, and rental income contributed significantly to personal income growth. In California, dividend, interest, and rental income rebounded substantially in 1995 following little change in 1994 as a result of property losses associated with the Northridge earthquake.

In all five of the western states, earnings in services increased substantially. In Arizona and Oregon, earnings increases were large in farming, in construction, and in finance, insurance, and real estate; in Oregon, earnings increases were also large in durable goods manufacturing and in wholesale trade. In Utah, earnings increased substantially in both durable goods and nondurable goods manufacturing, in construction, and in retail trade. In New Mexico, retail trade earnings increased substantially, and in California, farm earnings increased substantially.

In Louisiana, Michigan, New Hampshire, Rhode Island, and South Carolina, large increases in dividend, interest, and rental income also contributed significantly to personal income growth. In addition, in Louisiana, New Hampshire, and South Carolina, increases were large in transfer payments.

In all five of these states, earnings in services increased substantially. In Louisiana, New Hampshire, and South Carolina, earnings increases were large in finance, insurance, and real estate. In addition, in Louisiana and South Carolina, earnings increased substantially in both wholesale and retail trade, and in South Carolina, earnings increased substantially in durable goods manufacturing. In Michigan, earnings increases were large in farming, in durable goods manufacturing, and in construction.

In 9 of the 10 states with the fastest growth in per capita income, personal income increased at above-average rates; the exception was Rhode Island. In New Hampshire and in four of the western states -- Arizona, Oregon, Utah, and New Mexico -- population increased at above-average rates; in Louisiana, Michigan, Rhode Island, South Carolina, and California, population increased at below-average rates or declined.

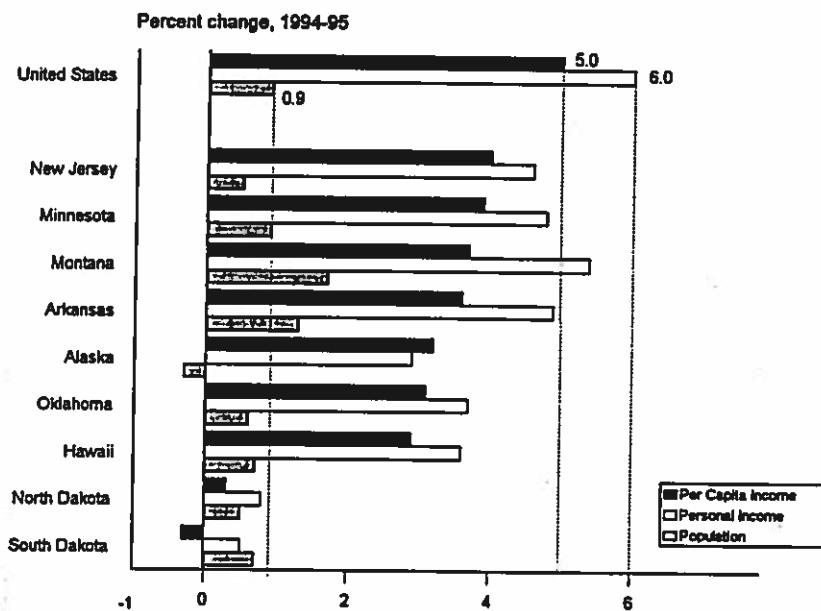

Slowest growing states

In nine states, increases in per capita personal income were 1.0 percentage point or more below the U.S. average of 5.0 percent.

In New Jersey, Montana, Alaska, and Hawaii, construction and government earnings either declined or increased little. In most of these states, earnings either declined or increased little in farming, in both durable goods and nondurable goods manufacturing, and in wholesale trade. In New Jersey, earnings declined in finance, insurance, and real estate, and in Montana and Hawaii, earnings increases were small in transportation and public utilities.

In Minnesota, Arkansas, Oklahoma, North Dakota, and South Dakota, large declines in farm earnings dampened personal income growth. In most of these states, earnings either declined or increased little in both durable goods and nondurable goods manufacturing and in construction. In Minnesota and Oklahoma, earnings increases were small in government, and in Arkansas, the earnings increase was small in retail trade.

In all nine states with the slowest growth in per capita income, personal income increased at below-average rates, and in all except Minnesota, Montana, and Arkansas, population increased at below-average rates or declined.

Rankings of states by the level of per capita income

The ranking of states by per capita income changed little between 1994 and 1995. The 10 states with the highest per capita incomes in 1995 were:

	Dollars		Rank	
	1994	1995	1994	1995
Connecticut	29,044	30,303	1	1
New Jersey	27,741	28,858	2	2
Massachusetts	25,608	26,994	4	3
New York	25,726	26,782	3	4
Maryland	24,869	25,927	5	5
New Hampshire	23,679	25,151	8	6
Nevada	23,817	25,013	7	7
Illinois	23,607	24,763	9	8
Hawaii	24,043	24,738	6	9
Alaska	23,431	24,182	10	10

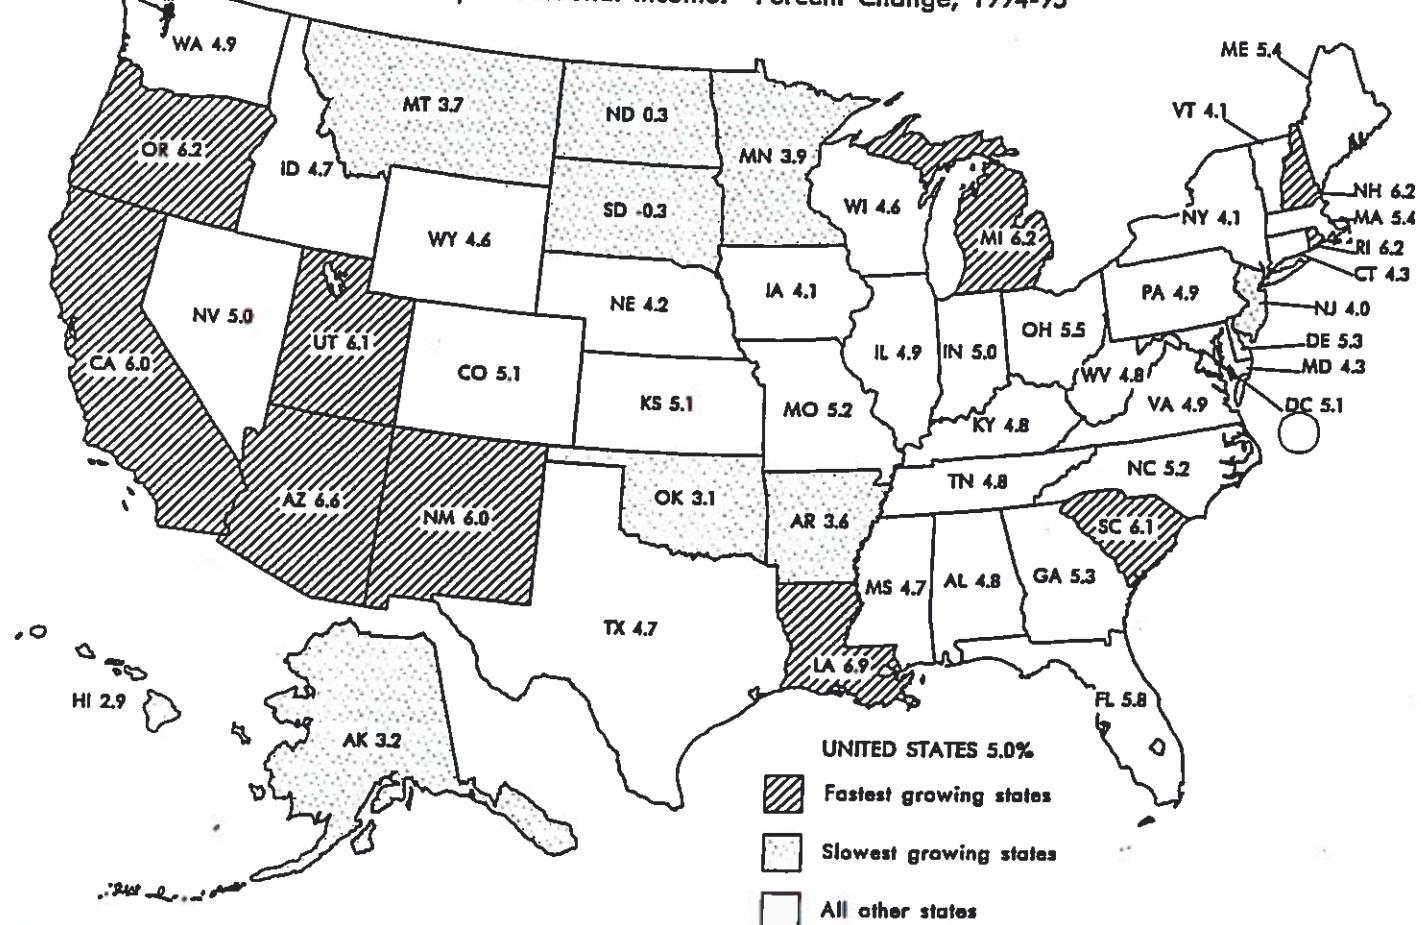

Of these 10 states, only New Hampshire and Hawaii changed more than one position in rank.

The 10 states with the lowest per capita incomes in 1995 were:

	-----Dollars-----		-----Rank-----	
	1994	1995	1994	1995
Alabama	17,925	18,781	40	41
North Dakota	18,610	18,663	38	42
Kentucky	17,752	18,612	42	43
Montana	17,824	18,482	41	44
Utah	17,171	18,223	46	45
Oklahoma	17,602	18,152	45	46
New Mexico	17,025	18,055	48	47
West Virginia	17,089	17,915	47	48
Arkansas	16,818	17,429	49	49
Mississippi	15,791	16,531	50	50

Of these 10 states, only North Dakota and Montana changed more than one position in rank.

Per Capita Personal Income: Percent Change, 1994-95

Bureau of Economic Analysis, U.S. Department of Commerce.

State personal income, fourth quarter 1995

In the fourth quarter of 1995, total personal income in the nation increased 1.2 percent, the same rate as in the third quarter.

In Utah, Nevada, Tennessee, Arizona, Texas, North Dakota, Georgia, New Mexico, and Vermont, increases in personal income were at least 0.5 percentage point above the 1.2-percent increase in the nation. In most of these states, increases in payrolls were strong in durable goods manufacturing, in construction, in retail trade, in finance, insurance, and real estate, and in services. In all of these states, increases in farm earnings were strong.

Definitions

Personal income is the income received by all persons from all sources, that is, from participation in production, from government and business transfer payments, and from government interest. Personal income is the sum of earnings (private and government wage and salary disbursements, other labor income, and farm and nonfarm proprietors' income), rental income of persons, personal dividend income, personal interest income, and transfer payments less personal contributions for social insurance. Personal income is measured before the deduction of personal income taxes and other personal taxes and is reported in current dollars (no adjustment is made for price changes).

The personal income level for the United States in this release is derived as the sum of the state estimates; it differs from the national income and product accounts (NIPA) estimate of personal income because, by definition, it omits the earnings of federal civilian and military personnel stationed abroad and of U.S. residents employed abroad temporarily by private U.S. firms. It can also differ from the NIPA estimate because of different revision schedules.

Per capita personal income is the annual total personal income of residents divided by resident population as of July 1.

Nonfarm income is personal income less farm earnings.

BEA estimates are available in several forms besides the printed news releases.

News releases are available at the time of public release through three subscription services offered by the Commerce Department's STAT-USA. Information on how to receive releases by FAX may be obtained by calling (202) 482-1986 (voice). Information about the Economic Bulletin Board (EBB) and about Internet services may be obtained at the same voice number and on-line, as follows:

EBB (202) 482-3870
Internet <http://www.stat-usa.gov>

* * *

Summary estimates are available on recorded messages at the time of public release at the following telephone numbers:

(202) 606-5306 Gross domestic product
5303 Personal income and outlays
5362 Summary of international transactions.

Most of BEA's estimates and analyses appear in the Survey of Current Business, BEA's monthly journal. The Survey of Current Business is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. First class mail: annual subscription \$90.00 domestic. Second class mail: annual subscription \$49.00 domestic, \$61.25 foreign; single issue \$11.00 domestic, \$13.75 foreign.

In addition, the Survey of Current Business is now available on Internet in a searchable, retrievable electronic format at least a week before the printed version. To subscribe to STAT-USA's World Wide Web system, go to <http://www.stat-usa.gov>. Subscriptions for single-user unlimited access to STAT-USA's Internet information are \$50.00 for 3 months or \$150.00 for 1 year. For further information, call (202) 482-1986.

* Net earnings by place of residence is earnings by place of work -- the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income -- less personal contributions for social insurance plus the adjustment for residence.

Note: States are listed in each region based on their percent changes in per capita personal income.
Source: Bureau of Economic Analysis, U.S. Department of Commerce.
